Re: Conditional Approval for Extension of Compliance - Amendment 1
NESHAP: Coal- and Oil-Fired Electric Utility Steam Generating Units
40 CFR 63, Subpart UUUUU (Utility MACT)
Grant Town Power Plant - Unit 1 (Boilers #1A & #1B) Grant Town, WV Plant ID No. 049-00026

Mr. Friend:

This amendment to the January 30, 2014 conditional approval of compliance extension for Unit 1 (Boilers #1A and #1B) at the Grant Town Power Plant is pursuant to your e-mail request of January 30, 2014. Specifically, the agency recognizes that American Bituminous will either install a new scrubber system, or upgrade and modify the existing emission control systems and equipment (limestone handling, etc.) to control hydrochloric acid and sulfur dioxide by the extended compliance date of April 16, 2016. The results of the scrubber feasibility study to be completed in second quarter 2014 will inform the choice of emission control system and equipment. This amended approval of compliance extension from the emission standards, work practice, and performance testing provisions of the *National Emission Standards for Hazardous Air Pollutants: Coal- and Oil-Fired Electric Utility Steam Generating Units* (Utility MACT) remains subject to the conditions in the January 30, 2014 letter from this agency (enclosed).

The amended compliance schedule required under 40 CFR 63.6.(i).6(i)(B), including activity dates, is listed below:
